SCREAMIN' EAGLE®

# ÖHLINS® SUSPENSION

## EXPERIENCE FACTORY TEAM SUSPENSION PERFORMANCE

Upgrade to the premium performance of the H-D Factory Racing Team suspension. Fully adjustable for compression and rebound damping, preload and also ride height on the rear shocks. Featuring race-spec linear spring rate. Remote reservoirs with stainless lines that look the business. Inverted fork design provides enhanced front-end rigidity with reduced steering inertia for unmatched feedback to the rider. Expertly tuned with the aggressive performance bagger rider in mind.

ÖHLINS

### 1. COMPRESSION ADJUSTER

- Fine-tunes suspension to control the upward wheel movement when hitting a bump
- Adjusts the speed at which the suspension compresses
- Critical for balancing ride quality and suspension bottoming

### 2. REBOUND ADJUSTER

- Fine-tunes the downward wheel movement after riding over bumps or potholes
- Adjusts the speed at which the suspension returns from extension
- Critical for balancing ride quality and suspension bounce

### 3. PRELOAD ADJUSTER

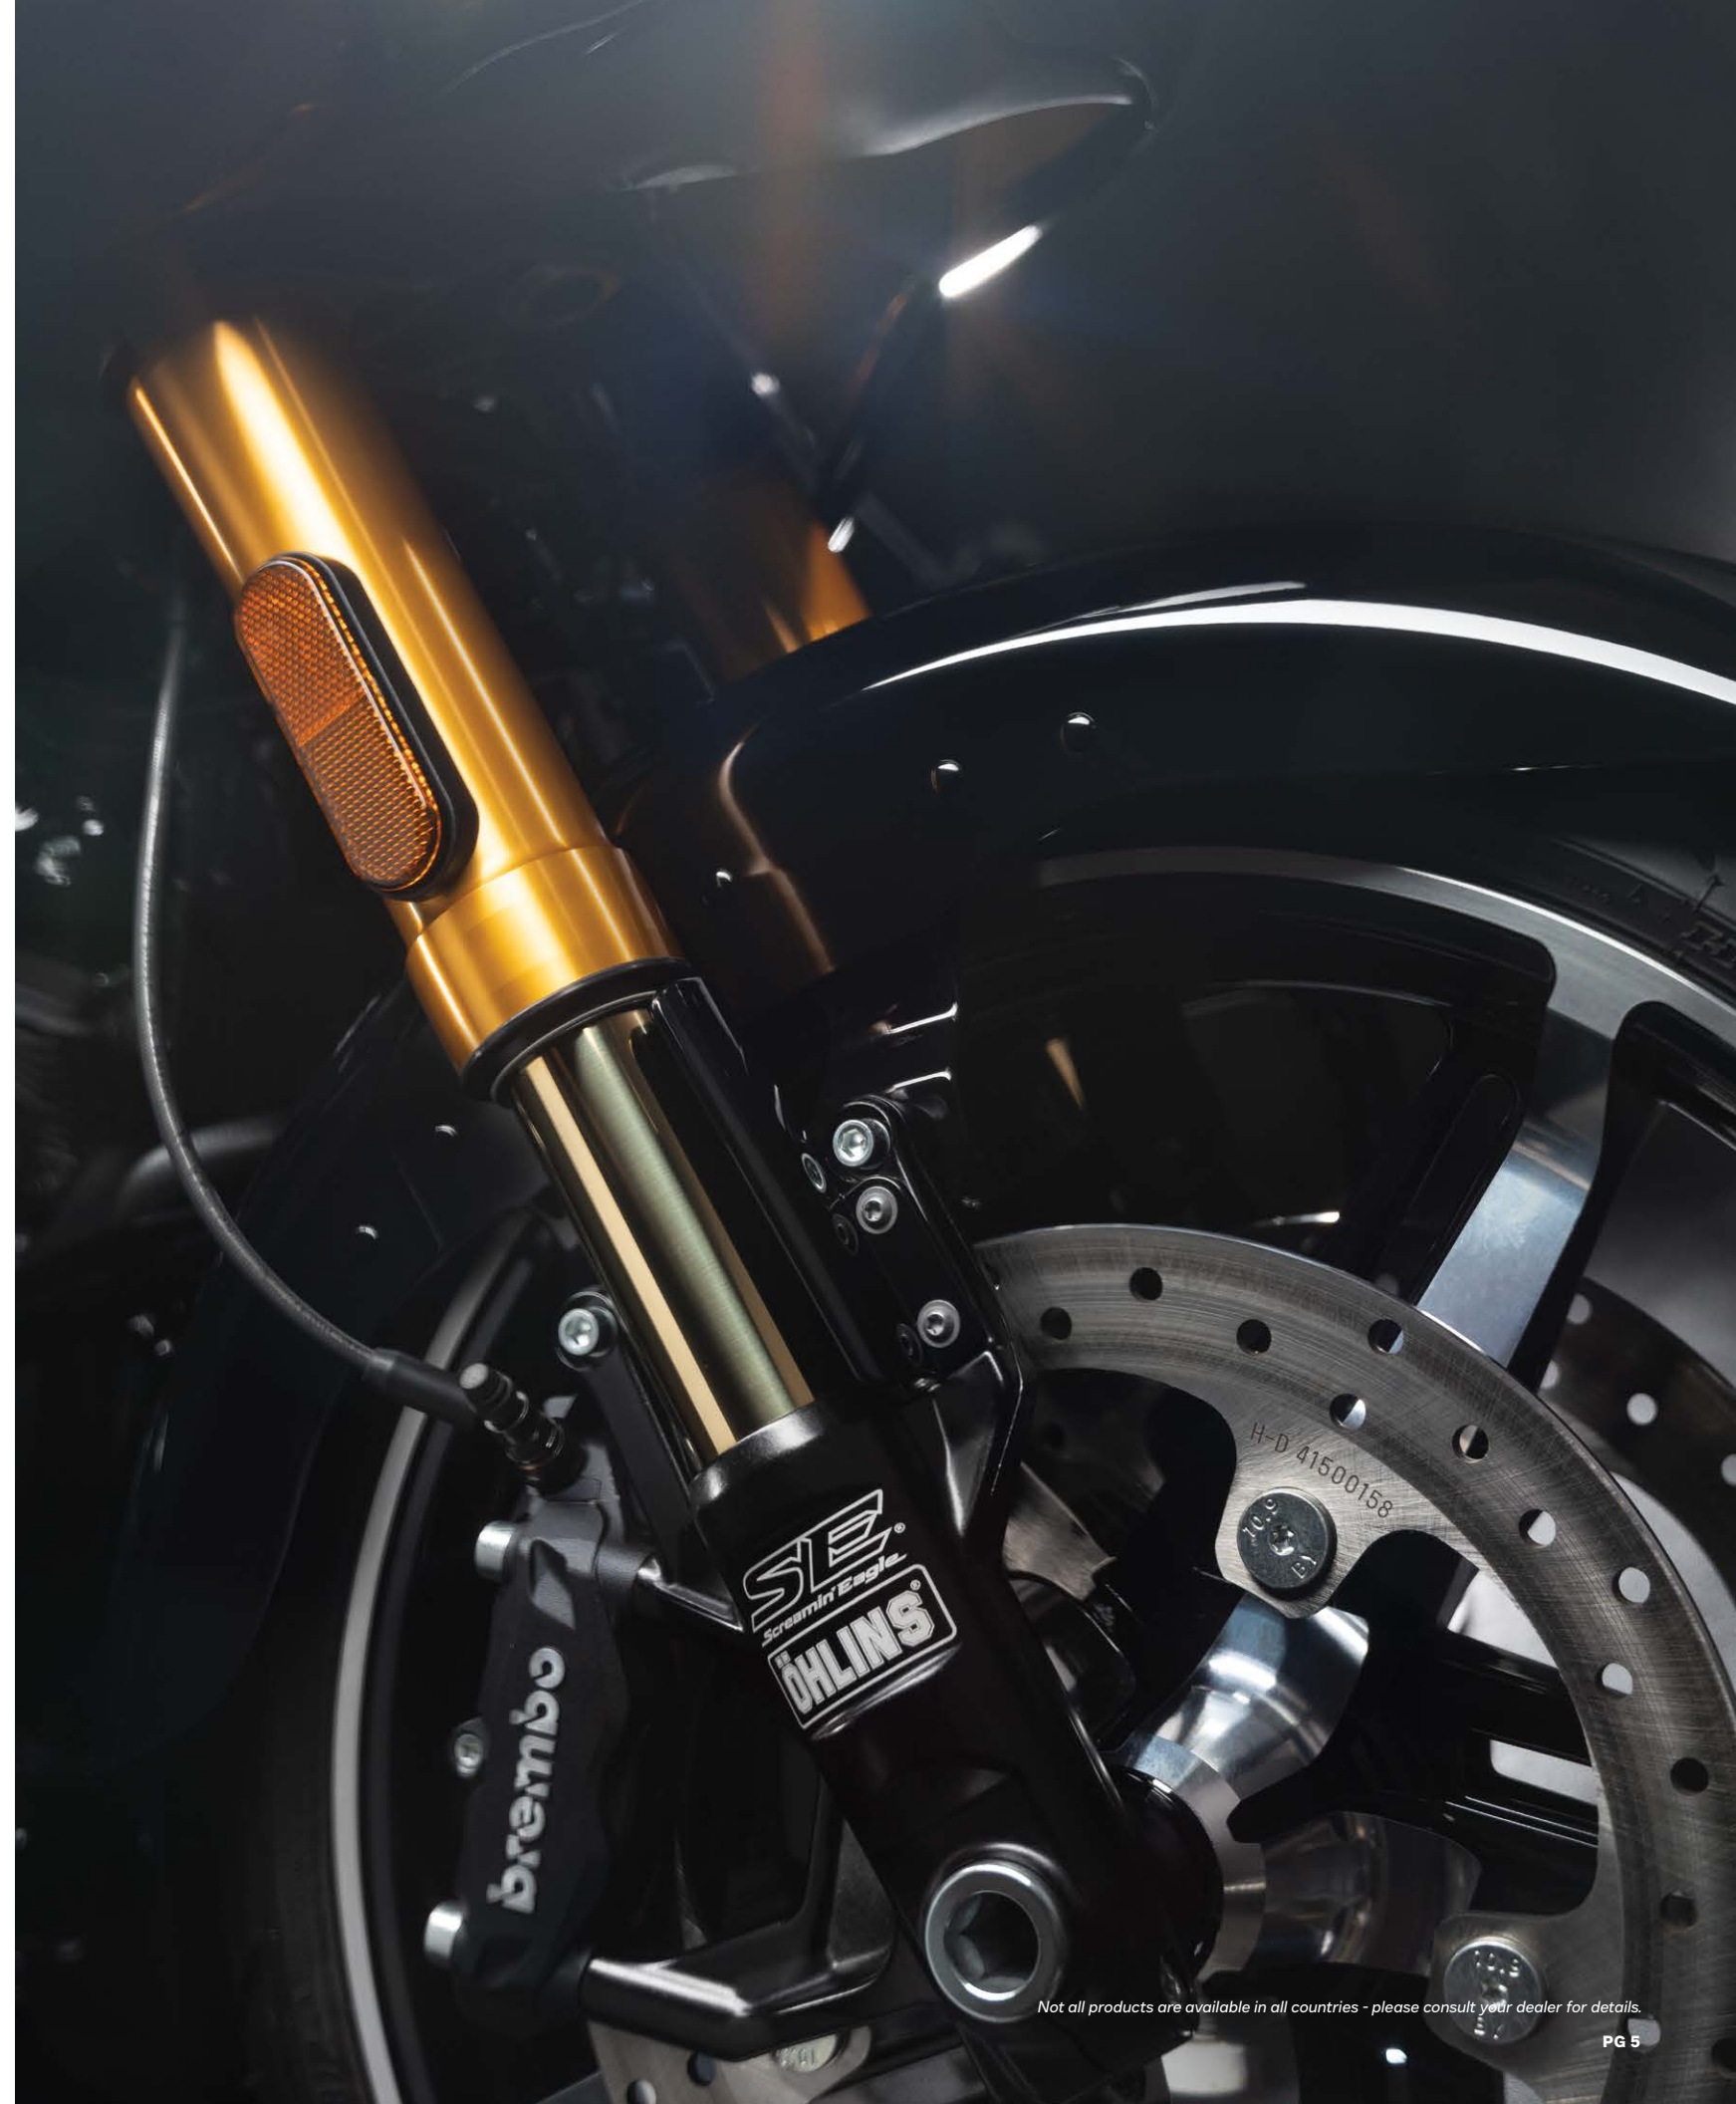

- Critical to setting the proper suspension travel to soak up large potholes and absorb large bumps
- Adjusts for rider sag—the amount the suspension drops under the weight of the rider and cargo

### 4. REMOTE RESERVOIR

- Remote reservoir keeps the shock oil cooler to maintain damping performance
- Internal bladder separates the oil from the nitrogen gas to reduce cavitation during aggressive riding

### 5. LENGTH

- The shock length is adjustable from +8mm to -2mm over the standard 13" height

# CUSTOMISE YOUR FIT

The relationship between your seat, handlebars and foot controls has an enormous impact on the comfort and enjoyment you feel when riding your motorcycle. Once you've picked your bike, it's time to choose the options that match your ride to your personal dimensions.

The options shown here for the Street Glide® model are also made in versions available to fit various Touring, Trike, and Cruiser models.

## SEATS

Where the seat positions you relative to the foot controls, hand controls and the ground plays a major role in the quality of your ride.

### FLHX OE

The 2026 Street Glide features a laden seat height of 26.4". Choosing an ergonomic seat can add or remove height to meet your needs.

### Tallboy®

Moves the rider up 1" to provide more arm and leg room for the long-limbed rider. Can be equipped with an optional rider backrest (except Adjustable style) for additional touring comfort.

### REACH

Enhanced back support padding moves the rider 0.8" lower and 1.5" forward without locking the rider into a cramped position. Can be equipped with an optional rider backrest for additional touring comfort.

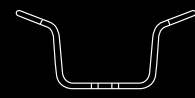

## HANDLEBARS

Choose a bar that falls easily to hand, and does not pull you out of the seat when maneuvering.

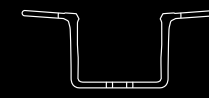

### FLHX OE

Pullback: 6.6"  
Rise: 10.6"  
Tip-to-Tip: 31.3"

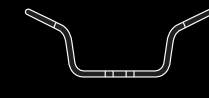

### BATWING TALLBOY™

Pullback: 6.74"  
Rise: 12.64"  
Tip-to-Tip: 31.48"

### BATWING FUSED

Pullback: 4.26"  
Rise: 13.72"  
Tip-to-Tip: 36.22"

### BATWING REACH™

Pullback: 6.97"  
Rise: 9.18"  
Tip-to-Tip: 32"

# COMFORT IS KING

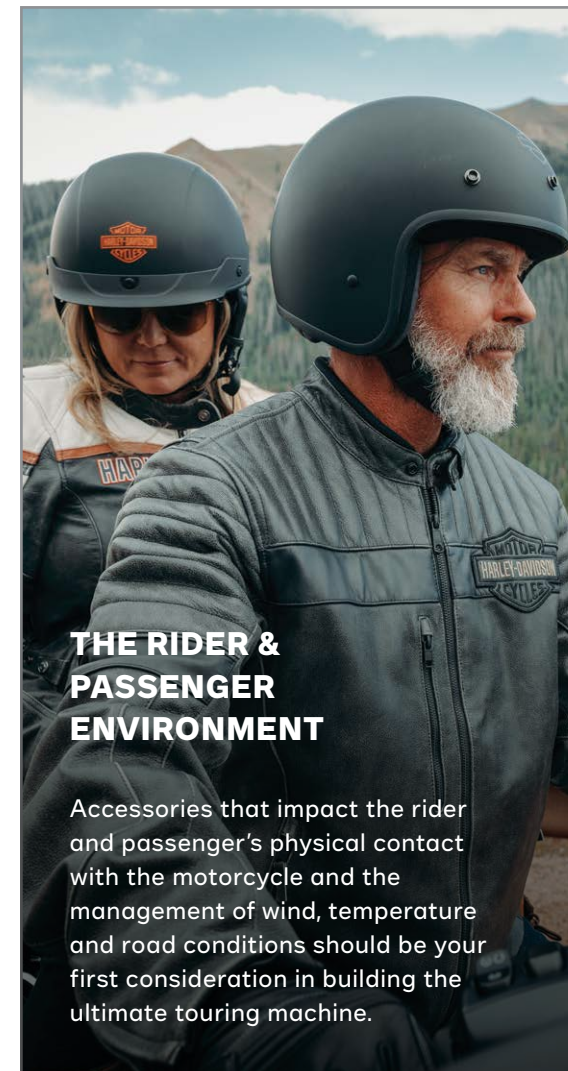

The ability to spend hours behind the handlebars and rack up hundreds of miles without stopping is dictated by how you feel on your bike. The shape of the seat, the reach to the handlebars and the location of your feet are all major factors in how far you can travel in a day. But don't forget your passenger's needs—he or she has a stake in this ride as well.

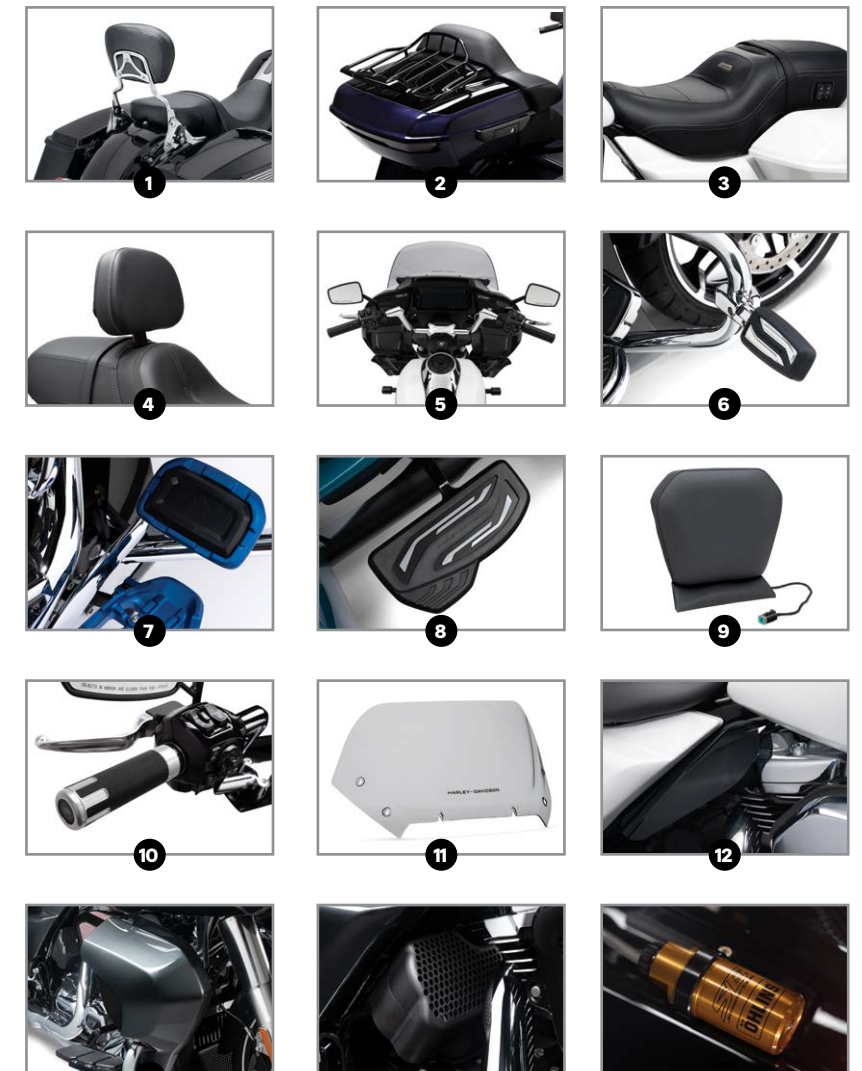

- 1 PASSENGER BACKREST** - Enhance your passenger's ride with a simple detachable backrest option, such as an adjustable upright with choice of pad.
- 2 LUGGAGE RACKS** - Add a space for adding additional removable luggage with a luggage rack, available for models with and without a Tour-Pak<sup>®</sup>.
- 3 SEATING** - Add long-haul comfort, and in some cases even heating, to your motorcycle with a Sundowner<sup>™</sup>, Reach<sup>™</sup>, Tallboy<sup>™</sup> or any other seat that you find best fits your needs.
- 4 RIDER BACKREST** - Enhance your ride with a rider backrest option, such as an adjustable rider backrest available in a variety of styles.
- 5 HANDLEBARS** - Change the look and comfort of your ride in one move by changing handlebars to address the hand position touch-point of the rider triangle.
- 6 HIGHWAY PEGS** - Stretch out for added comfort when cruising with a highway peg mount and choice of footpeg.
- 7 FOOT CONTROLS** - Change the way a rider interacts with their feet, or simply just the look of the bike, by adding a heel shifter, jiffy stand extension, and more.
- 8 PASSENGER FOOTBOARDS** - Add more surface area for your passenger's feet with passenger footboard mounts and choice of stylish footboards.

- 9 TOUR-PAK<sup>®</sup> PASSENGER BACKREST** - Enhance your passenger's ride with a stylish Tour-Pak backrest, such as an heated backrest pad for added comfort on cooler rides.
- 10 HEATED GRIPS** - Combine style and comfort on cool morning or frigid night rides with variable temperature heated grips.
- 11 WINDSHIELDS** - Find your perfect amount of airflow and wind deflection by changing the height of your windshield. Start with a windshield that is just below your eye line when looking straight ahead.
- 12 WIND DEFLECTORS** - Deflect wind coming off of the engine away from the rider with a mid-frame air deflector.
- 13 FAIRING LOWERS** - Add style and wind protection with fairing lowers that control the amount of air traveling toward the riders legs, and can provide additional storage space, or lighting and speaker mounting locations.
- 14 COOLFLOW<sup>™</sup> FAN** - Keep yourself comfortable by pulling air from the rear cylinder and exhaust pipe and blowing towards the ground. A must have for riders frequently in traffic or riding in parades.
- 15 ADJUSTABLE SUSPENSION** - Dial in your suspension performance with Screamin' Eagle<sup>™</sup> x Öhlins<sup>™</sup> front and rear suspension components. Adjust preload to account for rider, passenger and gear weight, as well as length, compression and rebound damping.

## THE RIDER & PASSENGER ENVIRONMENT

Accessories that impact the rider and passenger's physical contact with the motorcycle and the management of wind, temperature and road conditions should be your first consideration in building the ultimate touring machine.
